COURSEWORK

THESIS
Enabling Bluetooth Low Energy
Technology in Cross-platform
Applications

CLASS PROJECTS
Mobile Development (iOS)
Algorithms in Javascript
Algebra & Number Theory
Multidimensional Datastructures
Operating Systems
Functional Programming
Computer Graphics & Geometry
Inovative business concepts

SKILLS

PROGRAMMING
Most experience:
Javascript • PHP
Solid knowledge:
C/C++ • Java • Ruby • Shell
Haskell • SQL • HTML/CSS
OpenGL • Cordova
Familiar:
Objective-C • Android • Go

WORKFLOW
Daily usage:
Vim • Git • Docker • SSH
Good knowledge:
AWS • Integration testing platforms

EXPERIENCE

SUB2HOME | Co-founder & CTO
June 2012 – now | Memmingen, Germany
- Full stack technical responsibility
- Architecture, Development, Mainainance, Deployment
- Created several Backbone and Angular based web applications
- Wrote a RESTful service oriented backend server

MOBILION | Mobile Software Engineer
Apr 2014 – Aug 2014 | Karlsruhe, Germany
- Created multiple cross-platform applications based on Cordova and Angular
- Research and evaluation for the use of iBeacons
- iBeacon cordova plugin
- Projects were sheduled in a scrum workflow

OPEN SOURCE | Author & Project Maintainer
2010 – now | world-wide
- Laravel packages
- Javascript packages
- Documenation for projects like boot2docker

ARTICLES

GULP AS A DEVELOPMENT WEB SERVER
Apr 2014 | Tuts+
In this tutorial, I explain how to use Gulp.js, in order to run a local web server with built-in, livereload support.

DEPLOYING AN APPLICATION USING CAPISTRANO
Nov 2013 | Tuts+
This article shows how to use Capistrano to deploy any kind of (backend) application.

TALKS & WORKSHOPS

2014	Coffeetablecoders	Docker - a platform for distributed applications
2014	DevCamp Karlsruhe	Getting started with Docker in 45 minutes
2013	KarlsruheJS	Javascript Development Workflow

AWARDS & CERTIFICATES

2013	Certificate	Business Plan Workshop
2013	Certificate	Scrum & Agile Development Workshop (SAP)
2012	1st prize	Techcrunch Disrupt NY
